Quick setup — if you've done this kind of thing before

Set up in Desktop   or | HTTPS | SSH | git@github.com:vikash9899/depth_estimation.git

Get started by creating a new file or uploading an existing file. We recommend every repository include a README, LICENSE, and .gitignore.

...or create a new repository on the command line

```
echo "# depth_estimation" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin git@github.com:vikash9899/depth_estimation.git
git push -u origin main
```

...or push an existing repository from the command line

```
git remote add origin git@github.com:vikash9899/depth_estimation.git
git branch -M main
git push -u origin main
```

...or import code from another repository

You can initialize this repository with code from a Subversion, Mercurial, or TFS project.
